

Cheat Sheet For Dënesųłıne (wm) Unicode Keyboard

High tones and nasals are added to vowels by typing the vowel first then the 4 or 6 or 7 key. (Note: 4, 6, & 7 keys only add diacritics. Dotted \circ is only for illustration.)

Upper and lower case shwa (Ë) is typed with the 2 & 3 keys. High tones or nasals may be added with the 4, 6 or 7 keys

The lower case “i” has no dot.

Voiceless L (ł) and Glottal (?) have their own keys. Upper Case is typed by holding shift.

Semicolon is moved to the right-bracket key.
